

PhD position on scaffolds for regenerative medicine using 3D printing and electrospinning at the School of Pharmacy and the Institute of Materials (iMATUS) at the University of Santiago de Compostela.

We offer a 3-year paid PhD position in the I+DFarma group (<https://www.idfarmausc.es/en/home/>) in close collaboration with an international network. You will actively work on the preparation and defense of a PhD thesis on stimuli-driven tissue regeneration using hybrid scaffolds. You will receive training on the subject and have the opportunity to present your work at international conferences and in scientific publications. Stays abroad are also planned. The start date is January 2025 or before depending on the candidate.

We are looking for a highly talented, cooperative and motivated PhD student with a strong background in biomedical sciences (e.g. Pharmacy) or engineering to join our team for the development of cutting-edge materials and technologies for tissue regeneration. Excellent communication and writing skills in (academic) English and perseverance are required.

You can apply for this vacancy by email to **carmen.alvarez.lorenzo@usc.es** until **18 October 2024** inclusive (Subject: PhD offer). Please make sure to include the following attachments:

- a motivation letter, describing relevant experience and interest in the proposed project
- a detailed CV
- contact details of two referees
